

## Abstract

The invention relates to foodstuffs having a savoury  
5 flavour, to a process for their preparation and to  
compositions having a savoury flavour which products  
comprise (hydrogenated) 2-methyl-3-furanthiol and/or a  
derivative thereof and methanedithiol and/or a derivative  
thereof. Under derivatives are here to be understood their  
10 esters like thioacetates, their thioethers like methyl  
sulfides their disulphides etc. The combination of the  
above identified two groups of sulphur compounds in ppb  
levels leads to a foodstuffs with powerful flavour  
reminiscent of beef broth.
